

Find the right product. Know when to ask.

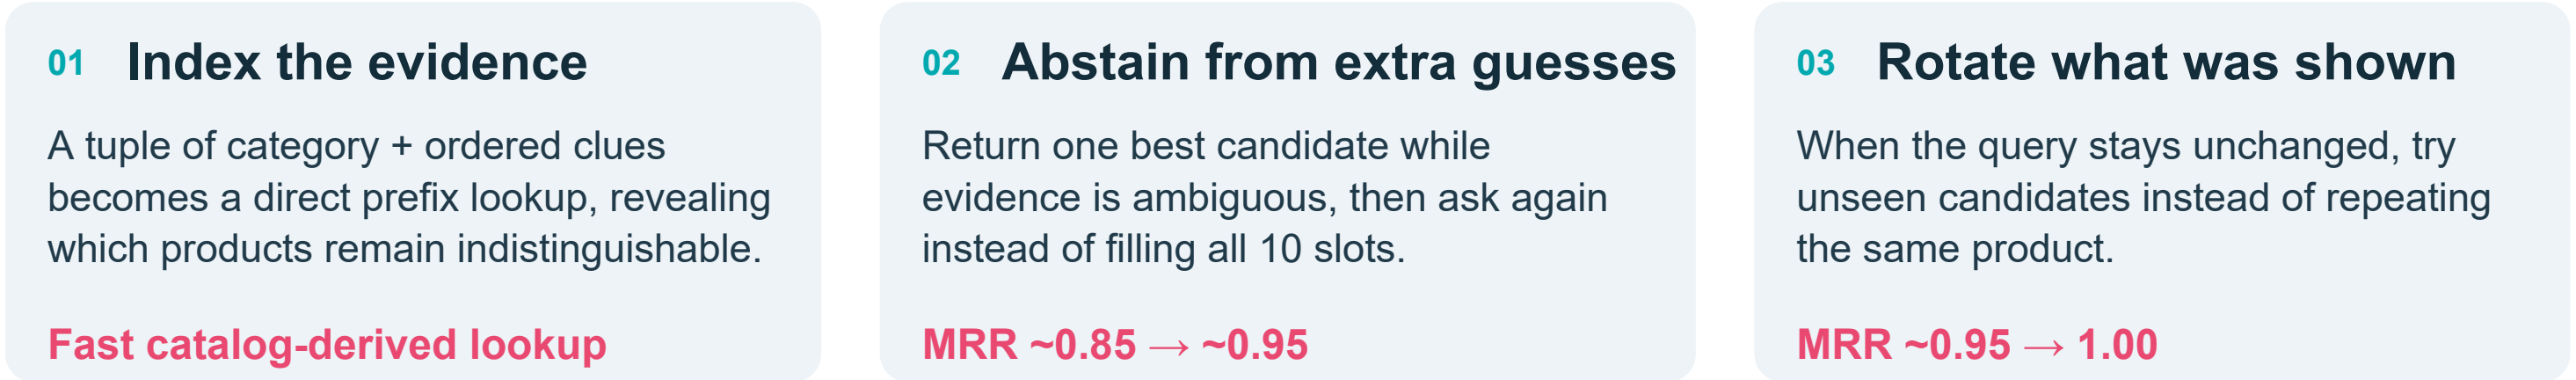

01 How the agent works

Exact architecture / Read top to bottom

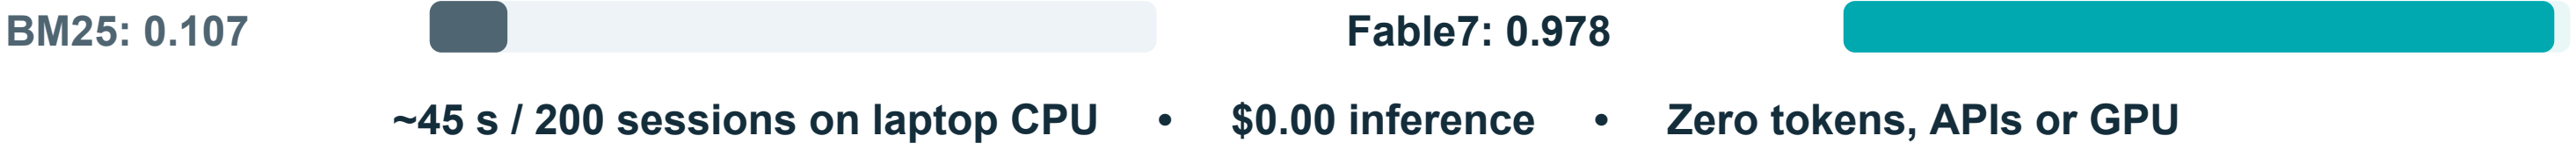

Fallbacks: unknown / empty category search → global search; incompatible or unmatched prefix → keep learned ranking.
Opening-turn policy may also return one candidate. Questions request the next requirement; no LLM selects an attribute.

02 Three breakthroughs

03 Results

200 public sessions / Reported evaluation & ablations

REAL-WORLD CONNECTION

Shopping assistants can remember corrections, ask before guessing, and run locally with predictable cost.

FUTURE WORK

Test paraphrases, incomplete clues and new catalogs beyond the current exact-quote simulator.
